TECHNICAL SKILLS

Programming	: JavaScript, C#
Frameworks and Libraries	: React.js, Next.js, Node.js, ASP.NET Core, Redux, React Testing Library, Python
Tools	: LangChain, LangGraph, Guardrail, Git, Swagger Hub, Postman, NPM, SQL Profiler
Web Services and Databases	: APIs, DOM, MongoDB, SQL, Prisma

PROFESSIONAL EXPERIENCE

Kasyap Sweetners Ltd., Mumbai: Software Developer Dec 2024 – Present

- Worked on the development of a new **internal ERP system**, contributing to system **architecture**, **backend services**, and **frontend workflows** used by multiple departments.
- Helped stabilize frontend state management by introducing **Redux Toolkit** and **RTK Query**, reducing recurring UI and data consistency issues.
- Built and maintained **reusable UI components** such as dynamic **tables**, configurable **dropdowns**, and shared **form validation utilities** to improve development speed and consistency.
- Developed and integrated core ERP modules using **ASP.NET Core**, **SQL Server**, and **React (TypeScript)**, following scalable service and data-layer patterns.
- Wrote and maintained **unit tests** for frontend and backend components using **Jest** and **Moq**.

Brainwonders Ltd Pvt., Borivali, Mumbai: Software Developer Nov 2023 – Nov 2024

- Developed an **admissions dashboard** with filtering and reporting features, working closely with backend APIs and optimized **SQL queries**.
- Assisted in migrating an existing **React application** to **Next.js**, including routing changes, SSR setup, and basic build optimizations to improve performance and SEO.
- Refactored **legacy components** by improving structure and reusability, making the codebase easier to maintain and extend for future features.

Weblord Infotech pvt. Ltd., Mumbai: Full Stack Developer Oct 2022 – Oct 2023

- Worked on a live **real-estate web portal** (*housingmagic.com*), contributing to frontend features and backend integrations for active users.
- Wrote and maintained clear **API documentation** using **Swagger Hub** to support internal development and onboarding.
- Implemented **location-based features** by integrating the **Google Maps API**, enabling users to search and view nearby properties.

PROJECTS

YT rag |Rag + Learning Asistant | [link](#)

- Semantic search across WDS videos and articles using AI embeddings, PostgreSQL, and pgvector.
- Context-aware AI assistant that retrieves relevant content chunks to answer user questions with grounded references to video timestamps and article sections.
- Durable Vercel Workflows for ingestion, chunking, embeddings, retries, and database persistence.
- GitHub OAuth and rate limiting for secure access, abuse prevention, and controlled AI/API usage.

Syllabrain | AI-Powered Textbook | [link](#)

- Built an AI syllabus platform using LLMs and OCR to convert images into structured learning content.
- Implemented LLM response formatting to generate reliable JSON hierarchies of semesters, modules, units.

EDUCATION

M.S.C., Computer Science	May 2024 - May 2026
B.S.C., Computer Science	Aug 2021 - May 2024
